Using the Online Safety Policy Template

An online safety policy provides educational settings with a framework to develop their online safety ethos and enables leaders and managers to detail strategic approaches and considerations, with regards to the safer use of technology.

The online safety policy should be recognised as a safeguarding policy, not a technical or computing policy and falls within the role and responsibilities the Designated Safeguarding Lead (DSL). There is no requirement for educational settings to have a separate online safety policy if online safety issues are appropriately addressed within other policies; this decision will be down to leaders and managers. If online safety is embedded within existing documents, settings should ensure that their community is aware of how and where to locate safety information, especially regarding responding to and reporting specific online safety concerns.

We encourage all educational settings to ensure that their online safety policy is individualised for their own specific context, to ensure that it is fit for purpose. It will not be appropriate for educational settings to adopt this template in its entirety; some statements will be more relevant to some settings than others.

This policy template requires leaders, managers and DSLs to adapt the content to include specific local information such as their own named points of contact, as well as their specific procedures and expectations. These decisions and details will vary from setting to setting, so this template should be used as a starting framework.
